"Health For All : All For Health"

Message From President and Hon. Secretary Desk

Dear Friends,

The heat wave is on and on and we all are eagerly waiting for rain to come. Water scarcity is impending and before any serious shortage of water occur, let us hope the rain quenches our thirst.

We have arranged 3 CME in last month. On 6th May on subject of Cardiology. Topics were 1. Recent advances in the treatment of heart failure 2. Valve repair versus valve replacement and 3. Perioperative care of patient going for cardiac surgery. What physician should know? The programme was a grand success.

On the 13th May subject was on Asthma. Topics were 1. Update in Asthma management and 2. All that wheezes is not Asthma. The programme was a grand success and audience fully participated in Question-Answer session.

On 20th May subject was on Gastrology. Topics were 1. Morbid Obesity Pandemic disease of this era-how can we tackle it ? 2. Approach to jaundiced patients and 3. Renal Replacement Therapy in AKI-A Paradigm Shift. The programme was grand success.

The World "No Tobacco day" is on 31st May. Friends, casual association of tobacco in any form to various malignancies is well known. This potential of carcinogenesis has been confirmed since a very long time and yet we see a rise in

number of oral and respiratory malignancies. It is indeed very sad to see the statistics showing rampant use of tobacco today, even in the young generations in various forms. Smoking leaves scars which are permanent and their impact is felt by the family members as well why burden them with our suffering. It is better to avoid them to suffer. We require to recreate the awareness of the dangerous of this poison called 'Tobacco' and help people in coming out of its addiction. So friends, start this noble activity from self and encompass your family, friend society and your patients in your programme for [1] Not falling prey to this addiction [2] Stop using tobacco in any form [3] De addiction and coming out of influence of tobacco containing items [4] maintaining the phase of de-addiction by accepting healthy option for happiness in life. Why can we not celebrate "No tobacco day" every day? The call of the day is to create an ambience for holistic and spiritual approach to life where happiness would come as a by-product. So say "No to Tobacco" today and live a healthier life.

Our next programme in June will be for general practitioner under auspices of College of GP IMA GSB.

We are to celebrate our Annual Day on 17th June at our premises. We want to honour member of our Association as well as family member for their various achievements in different field.

We are also to organize our "AMACON-2018" in July.

Details of entire programme is given in bulletin.

SCIENTIFIC PROGRAMME NO. 8

Dr. M. G. Pandejee & Mrs. Hiraben M. Pandejee
Scientific Program with College of G. P. GSB IMA

Date : 10-06-2018 SUNDAY
Venue : Ahmedabad Medical Association
Subject : Symposium on "RED FLAGS"
Time : 9.30 a.m. to 10.00 a.m.
 Registration and Breakfast

Programme : 10.00 a.m. to 12.30 p.m.

Speaker : Dr. Vipul Shah, M.D. (Infectitious Diseases)
Topic : Red Flags for important diseases presenting with FEVER
Speaker : Dr. Bhavin Mehtalia, M.D., D.M. (Nephrology)
Topic : Red Flags in Acute & Chronic Disease
Speaker : Dr. Himanshu Desai, M.D. (Psychiatry)
Topic : Red Flags in Psychiatric Disorders
Speaker : Dr. Abhay S. Dikshit, M.B.B.S., F.C.G.P.
Topic : Identifying the 'TOUCH'

Programme will be followed by LUNCH

Co-Ordinators

Dr. Divyeshkumar N. Panchal and Dr. Pratik J. Shah

Registration fee Rs. 50/-. You are requested to register your name at our AMA office on telephone No. 079-26588775 before 07-06-2018 before 5pm.

AHMEDABAD DECLARATION

219 Central Working Committee Meeting of Indian Medical Association held on 14,15 th April 2018 in Ahmedabad

Ahmedabad Declorotion comes from the banks of the river Sabarmati and from the land of Mahatma Gandhi & Sardar Patel. It may be recalled that Pandit Jawaharlal Nehru had given Declaration of "Complete Freedom" on the banks of river Ravi in 1929.

The 219th Central Working Committee of Indian Medical Association the Parliament of IMA representing all the states and union territories after threadbare discussions on all the dimensions and impact of the ill conceived National Medical Commission Bill 2017 finds it in its entirety to be anti people and anti medical profession.

IMA declares the bill to be grossly pro rich even after the proposed amendments. The impact it will have on the one count of medical education becoming un accessible to poor and downtrodden and producing doctors predominantly from the rich and urban sections of the population is unacceptable. IMA has the national duty to fight this black law as the voice of voiceless.

The cosmetic changes that have been made to the bill have not restored the autonomy of the medical profession rightfully conferred by the IMC Act 1956 which has given the nation doctors of international calibre and has formed the foundation of patient care and patient safety in this country. Trampling upon the autonomy of medical profession will have unforeseen consequences on the Health of the nation which cannot be undone for many generations to come.

The anti federal nature of the Bill in marginalising State Governments, State Medical Councils and State Health Universities is a direct assault on the constitution and the concept of India as Union Off States. Indian Medical Association which was baptised in our freedom struggle rejects the National Medical Commission 2017 in toto fulfilling its commitment to the Health of our people and resolves to fight relentlessly this anti people legislation with all the resources at its command and by directly taking the issue to the people.

ACTIVITY REPORT

"Kavi Sammelan " of Doctors, "Sahitya no Choro"

On 29-04-2018, along with Sur-Samanyay foundation, Ahmedabad Medical Association had arranged "Kavi Sammelan " of Doctors, "Sahitya no Choro" at the premises of our association. Various doctors from all over Gujarat recited their creations. It was attended by large numbers of members. This unique and different programme was appreciated by all. It was followed by Dinner.

Scientific Programme : No 5

On 06-05-2018, Sunday scientific programme was arranged.

Topic was Cardio Vascular Update.

Dr Anil Jain talked on Recent advances in treatment of Heart Failure.

Dr Rajan Modi talked on Valve Repair Versus Valve replacement.

Dr Vishal Gupta talked on Peri operative care of patients going for Cardiac Surgery.

Programme was followed by Lunch. It was arranged at Hotel Radisson Blu.

Scientific Programme : No 6

On 13-05-2018, Sunday Scientific Programme was arranged.

Dr Manoj Singh talked on Update in Asthma Management.

Dr Mitesh Dave talked on All that wheezes is not Asthma.

Programme was followed by Lunch. It was arranged at the premises of our association.

Scientific Programme : No 7

On 20-05-2018, Sunday Scientific Programme was arranged.

Dr Digvijaysinh Bedi talked on Morbid Obesity Pandemic disease of this era- How can we tackle it ?

Dr. Bhavin Vasavada talked on Approach to Jaundiced Patients

Dr. Kamal Goplani talked on Renal Replacement Therapy in AKI-A Paradigm Shift.

Programme was followed by Lunch. It was arranged at the premises of our association.

Every year International Awareness Day for Kangaroo Mother Care is celebrated all over the world on 15th May

KMC Foundation, India, a not for profit, voluntary service organization brings to attention of the readers a few basic but important facts about KMC

Our mission is to convey that

Mother's Chest is the best place for care of the newborns

Mother's milk is the best food for the newborns

Zero separation of mother and child as much as possible is by far the best policy

Our vision is to make KMC as a part of routine care of all the newborns especially the low birth weight babies including preterm babies

A few facts about KANGAROO MOTHER CARE (KMC)

What is Kangaroo Mother Care?

Kangaroo Mother Care is the direct, skin to skin contact, a loving body hug between the mother (or any other care giver like father or anyone else) and her newborn baby on bare chest, without any clothing in between. This method of newborn care was originally started in Bogota (Columbia, South America) merely to prevent hypothermia of the low birth weight babies. But now several benefits have been appreciated.

Kangaroo Mother Care by definition has 3 integral parts, namely:

- 1) Kangaroo POSITION-Skin to Skin Contact
- 2) Kangaroo NUTRITION-Exclusive Breast Feeding as far as possible,
- 3) Kangaroo DISCHARGE-Early Planned Discharge and Follow Up including that of Neurodevelopment

How did KMC start?

KMC started in Bogota, Columbia, South America in the year 1978.

In one of the largest of Bogota Public Maternity Hospitals, coping with almost 33000 deliveries every year, there just was not enough of the space, the staff, the infrastructure, the incubators and other facilities to cater to the dire needs of the babies many of whom were premature and Low Birth Weight. Many babies inevitably died of Hypothermia and Infections; many were even abandoned by their mothers leaving them to their own fate. Inevitable Mother Child separation brought in its wake complications of its own including post partum depression and difficulties of breast feeding

In this scenario of Overcrowding, Understaffing, Inadequacy of facilities and High Mortality and Morbidity amongst the Newborns, it was Dr. Edgar Ray, bless him, who thought of putting the bare child to the Mother's bare chest primarily to use Mother's body heat to prevent Hypothermia in the newborn as there just were not as many warmers and

incubators for all those who needed them. To much of Dr. Ray's delight and surprise he noticed that not only the babies did not get cold but survived well and what more, showed better growth rates even after going home. This prompted him to adopt KMC as a routine for every low birth weight baby who was otherwise physiologically stable.

Subsequent studies were not only eye opener and rewarding to Bogota but opened up the flood gates to force the world to take note of this low cost, low intervention, humane approach to child care with zero separation of mother and child, with all its benefits that came forth to light under scientific scrutiny.

What are the Benefits of KMC?

Benefits to the newborn : Prevention of hypothermia, early physiological stability, early exclusive and sustained breast feeding, better growth rate, better mother infant bonding, secure feeling for the baby and early stimulation of all the sensory faculties for better neurologic growth.

Long term benefits include sustained breast feeding, better growth, better IQ and brain growth.

To The Mother : Direct involvement in child care, better lactation, feels empowered, confident, has less stress and post partum depression.

To The Family : Better involvement in child care, less cost because of early discharge and minimum disruption in the family routine. In the long run, better IQ and brain growth add to the

advantages

To The Community and Nation : Less cost, better IQ and brain growth makes for a better citizen.

Why KMC should be promoted in our country?

India has an unenviable Newborn Health Status Record (Gujarat particularly so).

We have the highest – more than 270 Lacks – number of births per year and also more deaths.

We have more than 7.6 Lac babies which are LBW including Preterm (Highest for any country) with high rates of mortality and morbidity

Our facilities for ideal hospital care for newborns are very inadequate.

Given this situation, low cost yet high impact intervention in the form of KMC and exclusive breast feeding requiring only a very little expertise and minimal Infrastructure (but a very high level of awareness and motivation), have a very large potential to save many lives due to easily preventable causes of mortality.

Lack of information, apathy, minimal earning potential of the family are some of our major constraints.

These benefits can be achieved only when at least 90% of eligible babies receive KMC coverage. The fact is, barely 5% of them get such care. It is, therefore, very essential to create awareness about the proper practice of KMC and HBKMC (Home Based KMC).

Role of KMCF (Kangaroo Mother Care Foundation), India

Kangaroo Mother Care Foundation, India – a Not for profit, Voluntary Service Organization - was launched in Ahmedabad after we hosted KMC International Conference in 2012 with the objectives to :

Accelerate awareness among general public for demand generation and better compliance,

Accelerate awareness among doctors, nurses, health workers so that all eligible babies can receive KMC with better quality of care,

Reduce apathy, misinformation and even wilful neglect,

Strengthen training programmes and take up some relevant research projects,

Support all the related projects of the governments and other agencies for the improvement of newborn care in our country and in addition take some innovative initiatives to achieve the objectives.

We request all the members of Ahmedabad medical Society to practice KMC whenever and wherever possible and spread the information to public in all possible ways.

For further information please see WWW.kmcfoundationinida.org or contact any one of the trustees.
