MONTHLY NEWS BULLETIN

Message from President's & Hon. Secretary's Desk

Dear members

Presently, we are observing the lots of the things happening around the Globe. Many things are under our control; but, many beyond... Tremendous advancement in healthcare technologies made possible to control & cure of various diseases which were beyond our capacity in past. The cancer is one of them. The early diagnosis & timely treatment can give normal quality of life to cancer patients. But, still a major part of community is unaware of it. An awareness programme arranged by Ahmedabad Medical Association was a step to fulfill the objective of current year "Close the care gap" between available resources & needy people.

On 73rd Republic Day, how can we forget the contributions of those noble persons, who nurtured the nation with their deeds & thoughts !! We will like to cite a quote of Swami Vivekananda, though harsh, but realistic,

"This life is short, the vanities of the world are transient, but they alone live who live for others, the rest are more dead than alive."

Considering it as our social responsibility, & as per directives from IMA GSB, we are in process to form a team to address the issues regarding stress amongst medical students. Separate teams comprising of 12-15 members in

each would be formulated for each medical college. This is a small step forward to address the issue which has been neglected since long. The medical students are future of our association, there are many challenges they may need to face in our profession. The stress management is the pivotal to tackle present & future challenges. It is a good initiation of Indian Medical Association; we shall & we will be actively participating in that movement.

We the doctors, by our profession - by default, are involved in living for others; but, there are many other opportunities, where we can act beyond. Ahmedabad Medical Association is continuously providing the platform for that. To provide social service is not the only thing necessary to built a good society; as been quoted,

Variety is the soul of pleasure.

-- Aphra Behn

AMA invites the innovative proposals from our members which would help to strengthen, unite, gather, delight & do betterment for our association & our community. An entertainment programme, તબીબી કવિ સંમેલન : "કવિતાની કેડીએ" is an example; which was a great success. Over & above scientific & social, such entertainment programmes could nurture our needs.

At last, it is worth to mention, the examination season is started; we wish all the best to the kids of our members who will be appearing in board's & various competitive exams!!

Advancing Health Through Innovation: (Part II)

Approvals of New Uses of Approved Drugs in 2022 by U.S. F.D.A:

After Center for Drug Evaluation and Research (CDER) of US FDA approves a new treatment, a drug sponsor may generate new data about the approved product that suggests an additional use. The drug sponsor may then submit an application to modify or expand the use of an approved drug based on this new data. The products below are notable 2022 approvals for new uses or indications of an approved drug:

- Empagliflozin tablets: which were first approved in 2014 for type 2 diabetes, were approved in 2022 to reduce the risk of cardiovascular death and hospitalization for heart failure.
- Baricitinib oral tablets: which were initially approved in 2018 for rheumatoid arthritis, were approved in 2022 to treat hospitalized adults with COVID-19 who need breathing assistance. This was the first immunosuppressant (therapy that reduces the body's immune response) approved for COVID-19. It was also approved in 2022 to treat adults with severe alopecia areata, an autoimmune disorder that causes hair to fall out, often in clumps. It is first CDER approval of a systemic treatment for alopecia.

- Dupilumab injection: was approved originally in 2017 for atopic dermatitis, was approved in 2022 as the first treatment for eosinophilic esophagitis, a chronic inflammatory disorder in which eosinophils, a type of white blood cell, are found in esophagus tissue, causing difficulty with swallowing and eating. It was also approved in 2022 for adults with prurigonodularis, a chronic skin disorder characterized by hard, extremely itchy bumps known as nodules. It is the first approved therapy for this disorder.
- Fenfluramine oral solution: was approved in 2020 for Dravet syndrome, a type of epilepsy, in patients aged two years and older. In 2022, CDER approved Fenfluramine to treat Lennox-Gastaut syndrome, another form of epilepsy, in patients aged two years and older.
- Setmelanotide injection: was approved originally in 2020 for obesity due to genetic conditions proopiomelanocortin (POMC), proprotein convertase subtilisin/kexin type 1 (PCSK1), or leptin receptor (LEPR) deficiency, was approved in 2022 for patients six years and older with obesity due to Bardet-Biedl syndrome, a rare genetic disorder. This is the first drug approved for chronic weight management in patients with Bardet-Biedl syndrome.
- Ruxolitinib cream: was first approved in 2021 for atopic dermatitis. In 2022, CDER approved the drug to

treat **nonsegmental vitiligo**, a condition that involves loss of skin coloring in patches of skin. It is the first CDER-approved drug to improve skin coloring for patients with this condition.

- Upadacitinib tablets: were originally approved in 2019 for moderate to severely active rheumatoid arthritis and active psoriatic arthritis. In 2022, it was approved to treat adults with moderately to severely active ulcerative colitis who have had an inadequate response or intolerance to another type of treatment. Ulcerative colitis is a type of inflammatory bowel disease.
- Risankizumab-rzaa injection: which was originally approved in 2019 for plaque psoriasis, was approved in 2022 to treat moderately to severely active Crohn's disease, a type of inflammatory bowel disease. It is the first new treatment for Crohn's disease in six years. It was also approved in 2022 for adults with active psoriatic arthritis, a systemic inflammatory disease that affects the skin and joints.
- Sodium Thiosulfate injection: was initially approved in 2012 for cyanide poisoning. In 2022, CDER approved it to reduce the risk of hearing loss (ototoxicity) associated with cisplatin in pediatric patients. It is the first treatment for this indication.
- Abaloparatide injection: was first approved in 2017 to treat postmenopausal women with osteoporosis at

high risk for fracture or patients who have failed or are intolerant to other available osteoporosis therapy. In 2022, it was approved to increase bone density in men with osteoporosis at high risk for fracture or patients who have failed or are intolerant to other available osteoporosis therapy.

• Alpelisib tablets: were first approved in 2019 for hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative, PIK3CAmutated, advanced or metastatic breast cancer. In 2022, it was approved for a rare overgrowth syndrome (PIK3CA-related overgrowth spectrum [PROS]) that mainly affects children. It is the first therapy for this syndrome.
